

## CLEANING EQUIPMENT

You will require:

A long-handled brush.

A hosepipe.

An appropriate ladder for reaching the guttering.

A bucket.

A sponge or cleaning mitt.

Microfibre cloths.

Mild caravan shampoo.

Window cleaner.

A window squeegee.

## GUTTERING & DOWNPIPES

- 1 Clear the guttering of any debris, leaves or build up that has occurred since it was last cleaned.  
*Make sure you set your ladder up safely.*
- 2 Inspect the guttering to make sure that none of the clips have come loose and it is still in good shape.
- 3 Run a hosepipe across the roof and into the guttering to make sure the downpipes are clear of any obstruction.

## CARAVAN

- 1 Inspect the seals, joints and corners on the caravan sides to make sure nothing is loose, broken or damaged.
- 2 With the hosepipe switched on and the nozzle set to a mist setting, start wetting down the caravan.  
*Run the hose pipe over the sides to encourage any loose debris to be washed away.*  
*Make sure not to point any water at extraction or air vents.*  
*Don't use a pressure washer as the sides are very delicate and can easily be damaged by high-pressure water.*
- 3 Add some caravan shampoo to a clean bucket and dilute as per the instructions.  
Take a long-handled brush and generously agitate the solution.
- 4 Start at the top of the caravan and brush liberally over the sides, working from top to bottom, to allow any debris or muck to easily dribble down.  
*Keep dipping the brush to apply plenty of cleaning solution and encourage suds to run down the caravan sides.*
- 5 Brush around the tops and sides of the window frames before gently brushing over the glass.
- 6 Use a sponge to gently clean vents, covers or surrounds.  
*Sponges are great for cleaning areas that the brush cannot fit, such as above vents or behind the guttering.*
- 7 If you find stubborn marks on the sides of your caravan, use a cream cleaner, such as Silky.  
*Silky is designed for touring caravans and boats and is great at removing stains or marks from the caravan.*
- 8 Once clean, hose the side down again to remove any cleaning products and give it a good rinse.
- 9 Wipe down the sides with a microfibre cloth to make it really shine.
- 10 Clean the windows with a glass cleaner.
